

Java Short Questions & Answers - Exam Revision

Q. What is Java?

Java is a high-level, object-oriented, platform-independent programming language.

Q. What is JVM?

Java Virtual Machine executes Java bytecode.

Q. What is JRE?

Java Runtime Environment provides libraries and JVM to run Java programs.

Q. What is JDK?

Java Development Kit contains JRE and development tools.

Q. What is Bytecode?

Intermediate code generated by the Java compiler.

Q. What is a Class?

A blueprint for creating objects.

Q. What is an Object?

An instance of a class.

Q. What is Encapsulation?

Binding data and methods into a single unit.

Q. What is Inheritance?

Acquiring properties of a parent class.

Q. What is Polymorphism?

One interface, many forms.

Q. What is Abstraction?

Hiding implementation details and showing essentials.

Q. What is Method Overloading?

Same method name with different parameters.

Q. What is Method Overriding?

Redefining a parent method in a child class.

Q. What is a Constructor?

Special method used to initialize objects.

Q. What is the *this* keyword?

Refers to the current object.

Q. What is the *super* keyword?

Refers to the parent class.

Q. What is a Package?

A collection of related classes and interfaces.

Q. What is an Interface?

A contract that classes implement.

Q. What is an Abstract Class?

A class that cannot be instantiated directly.

Q. What is Exception Handling?

Mechanism to handle runtime errors.

Q. Difference between *==* and *equals()*?

== compares references, *equals()* compares content.

Q. What is a String?

An immutable sequence of characters.

Q. What is *StringBuilder*?

A mutable class used for efficient string modification.

Q. What is Multithreading?

Executing multiple threads concurrently.

Q. What is Synchronization?

Controlling access to shared resources.

Q. What is a File?

A named location used to store data permanently.

Q. What is Serialization?

Converting an object into a byte stream.

Q. What is Deserialization?

Converting byte stream back into an object.

Q. What is a Collection?

Framework used to store and manipulate groups of objects.

Q. What is ArrayList?

A dynamic array implementation in Java.
