

Software Engineering

1. Difference between program Vs Software.
2. Different types of documentation. Difference between Verification & validation
3. Difference between classical & Iterative waterfall model.
4. What are the tasks involved in requirement analysis / Engineering?
5. Discuss Spiral Model. (with diagram)
6. What do you mean by feasibility study?
7. Define DFD(With Diagram). Types of DFD.
8. Explain ER Diagram(With Diagram).
9. Difference between Coupling & Cohesion Or, Briefly discuss Coupling & Cohesion and its type.
10. How to create a Data flow model. Briefly discuss data flow diagram.
11. Define Testing.
12. Difference between black box Testing &

white box testing

13. Difference between alpha testing & beta testing
14. Why software testing is necessary?
15. Difference between Cocomo I & Cocomo II model.
16. Define Software quality Assurance
17. Difference between QA & QC
18. Short Note :

SDLC, Prototyping Model, Software Crisis,
Software Risk, CPM, Gantt Chart, PERT, ISO 9000
