

1. What is Software Engineering?

- A. Writing programs only
- B. Systematic approach to software development ☒
- C. Hardware design
- D. Database management

Answer: B

2. Which model is also called the Linear Sequential Model?

- A. Spiral Model
- B. Agile Model
- C. Waterfall Model ☒
- D. RAD Model

Answer: C

3. The first phase of SDLC is:

- A. Design
- B. Coding
- C. Requirement Analysis ☒
- D. Testing

Answer: C

4. SDLC stands for:

- A. Software Design Life Cycle
- B. System Development Life Cycle
- C. Software Development Life Cycle ☒
- D. Software Deployment Life Cycle

Answer: C

5. Which phase converts requirements into architecture?

- A. Design Phase ☒
- B. Testing Phase

- C. Maintenance Phase
- D. Coding Phase

Answer: A

6. Which model is best when requirements are clearly defined?

- A. Spiral Model
- B. Waterfall Model ☒
- C. Agile Model
- D. Prototype Model

Answer: B

7. The process of finding errors in software is called:

- A. Coding
- B. Testing ☒
- C. Maintenance
- D. Documentation

Answer: B

8. Verification means:

- A. Building the product right ☒
- B. Building the right product
- C. Removing bugs
- D. Installing software

Answer: A

9. Validation means:

- A. Building the product right
- B. Building the right product ☒
- C. Coding correctly
- D. Maintenance

Answer: B

10. White Box Testing focuses on:

- A. Internal code structure ☒
- B. User requirements
- C. GUI design
- D. Performance

Answer: A

11. Black Box Testing focuses on:

- A. Program code
- B. Internal logic
- C. Input and Output behavior ☒
- D. Database structure

Answer: C

12. Unit Testing is performed on:

- A. Entire system
- B. Single module ☒
- C. Multiple modules
- D. Database

Answer: B

13. Integration Testing checks:

- A. Individual functions
- B. Combined modules working together ☒
- C. User acceptance
- D. Documentation

Answer: B

14. Which testing is performed by customers?

- A. Unit Testing
- B. Integration Testing

C. Acceptance Testing ☒

D. Regression Testing

Answer: C

15. A bug found after fixing another bug is checked by:

A. Alpha Testing

B. Regression Testing ☒

C. Unit Testing

D. Beta Testing

Answer: B

16. Alpha Testing is performed by:

A. End users

B. Developers/Testers within organization ☒

C. Clients only

D. Database administrators

Answer: B

17. Beta Testing is performed by:

A. Developers

B. Testers

C. Actual Users ☒

D. Managers

Answer: C

18. Software Maintenance performed to fix errors is:

A. Adaptive

B. Perfective

C. Corrective ☒

D. Preventive

Answer: C

19. Software Maintenance performed due to OS changes is:

- A. Corrective
- B. Adaptive ☒
- C. Perfective
- D. Emergency

Answer: B

20. Maintenance done to improve performance is:

- A. Perfective ☒
- B. Corrective
- C. Adaptive
- D. Preventive

Answer: A

21. SRS stands for:

- A. Software Requirement Specification ☒
- B. Software Running System
- C. System Requirement Solution
- D. Software Resource Sheet

Answer: A

22. Which document describes software requirements?

- A. User Manual
- B. SRS Document ☒
- C. Test Report
- D. Source Code

Answer: B

23. Feasibility Study is done to check:

- A. Coding style
- B. Project viability ☒

- C. Testing methods
- D. Maintenance

Answer: B

24. Which feasibility checks whether the project is affordable?

- A. Technical Feasibility
- B. Operational Feasibility
- C. Economic Feasibility ☒
- D. Legal Feasibility

Answer: C

25. Which feasibility checks technology availability?

- A. Economic
- B. Operational
- C. Technical Feasibility ☒
- D. Social

Answer: C

26. CASE stands for:

- A. Computer Aided Software Engineering ☒
- B. Computer Application Software Engineering
- C. Centralized Software Environment
- D. Coding and Software Evaluation

Answer: A

27. A software project manager is responsible for:

- A. Only coding
- B. Project planning and control ☒
- C. Testing only
- D. Documentation only

Answer: B

28. Which model supports continuous customer feedback?

- A. Waterfall
- B. Agile ☒
- C. V-Model
- D. Incremental

Answer: B

29. In Spiral Model, the most important activity is:

- A. Coding
- B. Risk Analysis ☒
- C. Documentation
- D. Maintenance

Answer: B

30. A Prototype is:

- A. Final software
- B. Trial version of software ☒
- C. Test report
- D. User guide

Answer: B

31. Which model follows a step-by-step approach?

- A. Agile
- B. Spiral
- C. Waterfall ☒
- D. Prototype

Answer: C

32. Which model is best for large and high-risk projects?

- A. Waterfall
- B. Spiral ☒
- C. RAD
- D. Prototype

Answer: B

33. RAD stands for:

- A. Rapid Application Development ☒
- B. Rapid Analysis Design
- C. Requirement Analysis Development
- D. Real-time Application Design

Answer: A

34. Agile development emphasizes:

- A. Documentation only
- B. Customer collaboration ☒
- C. Hardware design
- D. Sequential execution

Answer: B

35. Prototype model is mainly used to:

- A. Reduce customer confusion ☒
- B. Increase coding
- C. Reduce testing
- D. Remove maintenance

Answer: A

Requirements Engineering

36. Requirement gathering is also known as:

- A. Coding
- B. Testing
- C. Elicitation ☒
- D. Verification

Answer: C

37. Functional requirements describe:

- A. What system should do ☒
- B. Cost of project
- C. Hardware
- D. Team structure

Answer: A

38. Non-functional requirements describe:

- A. Functions
- B. Quality attributes ☒
- C. Coding rules
- D. Program structure

Answer: B

39. Reliability is a:

- A. Functional requirement
- B. Non-functional requirement ☒
- C. Coding standard
- D. Testing method

Answer: B

40. Performance is:

- A. Functional requirement
- B. Non-functional requirement ☒
- C. Risk
- D. Constraint

Answer: B

Software Design

41. Design phase comes after:

- A. Testing
- B. Requirement Analysis ☒

- C. Maintenance
- D. Deployment

Answer: B

42. Coupling should be:

- A. High
- B. Low ☒
- C. Medium
- D. Very High

Answer: B

43. Cohesion should be:

- A. Low
- B. Medium
- C. High ☒
- D. None

Answer: C

44. High cohesion indicates:

- A. Better design ☒
- B. Poor design
- C. High cost
- D. More bugs

Answer: A

45. A Data Flow Diagram represents:

- A. Data movement ☒
- B. Program code
- C. Database tables
- D. Hardware devices

Answer: A

Testing

46. Testing aims to:

- A. Prove software is error-free
- B. Find defects ☒
- C. Increase cost
- D. Reduce functionality

Answer: B

47. Which testing is done first?

- A. Unit Testing ☒
- B. Integration Testing
- C. System Testing
- D. Acceptance Testing

Answer: A

48. System Testing checks:

- A. Individual modules
- B. Entire software system ☒
- C. Single function
- D. Database only

Answer: B

49. Smoke Testing is performed to:

- A. Verify major functions work ☒
- B. Improve speed
- C. Remove hardware errors
- D. Check database

Answer: A

50. Stress Testing is used to:

- A. Test under extreme load ☒
- B. Check coding style

- C. Test UI
- D. Test documents

Answer: A

Software Metrics

51. Software metric is used to:

- A. Measure software characteristics ☒
- B. Write code
- C. Test hardware
- D. Create database

Answer: A

52. LOC stands for:

- A. Line of Code ☒
- B. Level of Coding
- C. Logic of Computer
- D. List of Commands

Answer: A

53. Software quality means:

- A. Bug-free software
- B. Meeting user requirements ☒
- C. Fast software only
- D. Cheap software

Answer: B

Project Management

54. Project planning is done by:

- A. Tester
- B. User
- C. Project Manager ☒
- D. Operator

Answer: C

55. Risk management deals with:

- A. Future uncertainties ☒
- B. Coding
- C. Testing
- D. Design

Answer: A

56. Risk that may cause project failure is:

- A. Software Risk ☒
- B. Hardware Risk
- C. Network Risk
- D. User Risk

Answer: A

57. A milestone represents:

- A. Significant project event ☒
- B. Error
- C. Bug
- D. Program

Answer: A

58. Gantt Chart is used for:

- A. Scheduling tasks ☒
- B. Coding
- C. Testing
- D. Database

Answer: A

Maintenance

59. Maintenance starts after:

- A. Design
- B. Deployment ☒
- C. Coding
- D. Requirement Analysis

Answer: B

60. Preventive maintenance aims to:

- A. Avoid future problems ☒
- B. Fix current bugs
- C. Improve speed only
- D. Change OS

Answer: A

Quality Assurance

61. SQA stands for:

- A. Software Quality Assurance ☒
- B. Software Quantity Assurance
- C. System Quality Analysis
- D. Software Quick Access

Answer: A

62. Quality Assurance is:

- A. Process-oriented ☒
- B. Product-oriented
- C. Coding-oriented
- D. Database-oriented

Answer: A

63. Quality Control is:

- A. Product-oriented ☒
- B. Process-oriented

- C. Hardware-oriented
- D. User-oriented

Answer: A

Risk Management

64. Risk identification is performed:

- A. Before coding ☒
- B. After maintenance
- C. During deployment only
- D. Never

Answer: A

65. Risk exposure depends on:

- A. Probability and impact ☒
- B. Cost only
- C. Time only
- D. Documentation

Answer: A

UML

66. UML stands for:

- A. Unified Modeling Language ☒
- B. Universal Modeling Language
- C. User Modeling Language
- D. Unified Machine Language

Answer: A

67. Use Case Diagram mainly shows:

- A. User interactions with system ☒
- B. Database tables
- C. Program code
- D. Testing strategy

Answer: A

68. Actor in UML represents:

- A. User or external system ☒
- B. Database
- C. Software module
- D. Function

Answer: A

Configuration Management

69. Version Control helps in:

- A. Tracking changes ☒
- B. Database design
- C. Hardware maintenance
- D. Testing

Answer: A

70. Git is an example of:

- A. Version Control System ☒
- B. DBMS
- C. Operating System
- D. Compiler

Answer: A

General Concepts

71. Software can be:

- A. System Software
- B. Application Software
- C. Both A and B ☒
- D. Neither

Answer: C

72. Bug and defect are:

- A. Different
- B. Same meaning ☒
- C. Unrelated
- D. Opposite

Answer: B

73. Debugging means:

- A. Finding and fixing bugs ☒
- B. Coding
- C. Designing
- D. Deploying

Answer: A

74. Software crisis refers to:

- A. Problems in software development ☒
- B. Hardware failure
- C. Power failure
- D. Virus attack

Answer: A

75. Documentation is important because:

- A. Helps maintenance and understanding ☒
- B. Reduces coding
- C. Removes testing
- D. Eliminates bugs

Answer: A

76. Feasibility study is conducted before:

- A. Requirement Analysis ☒
- B. Maintenance

- C. Coding
- D. Deployment

Answer: A

77. Which one is NOT a software process model?

- A. Waterfall
- B. Spiral
- C. Agile
- D. Keyboard Model ☒

Answer: D

78. Software engineering aims to:

- A. Reduce cost
- B. Improve quality
- C. Deliver software efficiently
- D. All of the above ☒

Answer: D

79. IEEE stands for:

- A. Institute of Electrical and Electronics Engineers ☒
- B. International Engineering Association
- C. Internet Engineering Enterprise
- D. Integrated Electrical Engineers

Answer: A

80. The ultimate goal of software engineering is:

- A. High-quality software delivered on time and within budget ☒
- B. More coding
- C. More testing
- D. More documentation

Answer: A
